Introduction to Blockchain

What is Blockchain? Simply put, Blockchain is a technology that revolutionized the storage of data online. It shares the information across a different network of computers, which makes it impossible to change, erase, or manipulate. In other words, it's a secure decentralized method for recording data, transactions and digital assets.

What is defi?

Defi is short for decentralized finance. It breaks the limitations of traditional financial services by making the entire process on blockchain networks. No need for intermediaries banks or any other brokers. On the contrary, Defi is a secure financial services that operate through smart contracts using Ethereum blockchain technology for example. Thus, the result is a more efficient, flexible and secure method for transactions.

What is the difference between coin and token?

Coins are cryptocurrencies that exist in their own blockchain, Such as Bitcoin, Ethereum, and Litecoin. In other words, Bitcoin exists in a Bitcoin blockchain. And Ethereum exists in a Ethereum Blockchain. Infact, Coins are just like real money you can use them to pay for items online, or store them for value.

On the other hand, Tokens don't have their own blockchain, but rely on already existing ones.

They might also exist in more than one blockchain which adds more flexibility when it comes to trading them.

Thanks to smart contracts platforms like Ethereum, users can create and manage their tokens easily.

What is Kuro?

Kuro is a cryptocurrency that aims at supporting youth projects around the world and providing humanitarian and educational assistance to bring the world to a higher level of cooperation and support.

More about Kuro

-KURO is a cryptocurrency that was launched by a multinational team of programmers with vast experience in blockchain programming. In fact, KURO is created with the belief in the bright future of human beings the need to keep up with technological and economic development in the world.

-KURO token aims mainly to support and provide appropriate funding for start-ups around the world after applying on our official website. The funding will be available in the advanced stages of the token's roadmap. Besides, Kuro also aims at integrating communities worldwide into a single project that supports their ideas and projects.

-KURO is actually a proof our generation keeps up to date with technology and international development, and is present in the cryptocurrency future. The success of KURO token depends on two parties, the token founders on one hand, and the token users worldwide on the other

-In the light of the rapid technological developments in the world in recent years, the use of Blockchain technology has become inevitable. It is both a secure and a fast solution for projects development. KURO is a token with a global and humanitarian orientation. Whether in helping strategic investments or in becoming an alternative for token users worldwide.

-Youth Project Submitting form available on Kuro official website, to make communication between youth projects owners and Kuro foundation team easier

What does Kuro mean?

In fact, Kuro comes from an ancient Kurdish coin that has not continued throughout history. Therefore, the name is chosen to connect the past, the present, and the future.

KURO'S Goals

- Supporting startups around the world
- Crowdfunding for projects around the world.
- Providing humanitarian assistance, including: Food, therapeutic, natural disasters and educational aid. Especially remote education
- Supporting non-profit organizations in humanitarian, education, and nutrition projects.
- improving cryptocurrency world ecosystem by using Kuro coin ecosystem to make it as payment method in many projects that kuro will be adopt
- Being the future crypto currency through an exchange platform that we have already started it
- And also it is supported and integrated to be a utility token through on going small entrepreneur business and then to higher businesses!

 - **Crypto News Aggregator and price-tracking, price alerts app** It will provide real-time crypto price data, news, and alert service for price changes also to by as Technical analysis platform helps you evaluate investments and identify trading opportunities by analyzing market-related data such as price movement
 - **Kuro coin blockchain** : Blockchain is an immutable, distributed ledger that is used for recording transactions and tracking assets within a network of businesses. It is a form of storing information that prevents anyone from changing, hacking, or cheating it. Intangible assets include intellectual property, patents, copyrights, and other brand assets. Tangible assets include houses, cars, cash, and land.
Kuro coin blockchain will work to allow digital information to be recorded and distributed but not edited. In this way, the blockchain is the foundation for immutable ledgers or records of transactions that cannot be altered, deleted, or destroyed. This is why blockchain are also known as distributed ledger technology (DLT). By spreading its operations across a network of computers
Kuro coin blockchain will operate without the need for a central authority. This reduces risk and eliminates many of the processing and transaction fees.

Technical details (Tokenomics):

Kuro is a token built on Binance Smart Chain network (BEP20).

BEP20 is the token standard of Binance Smart Chain. In many ways, it's similar to Ethereum's ERC20 standard; in other ways, it expands on it. BEP20 sets rules that all tokens created on BSC need to follow.

The BEP20 token standard on BSC applies to any token that is launched or created on Binance Smart Chain's platform.

Just as Ethereum has gas fees, BNB pays for the transactions involving BEP20 tokens on Binance Smart Chain's network.

Token name: Kuro

Symbol: KUR

Max Supply : 300,000,000

Contract Address: 0xA6fB39D69b09ECdc1a8b5f829DF11a40B7742603

Network : Binance Smart Chain Mainnet (BEP20)

Token Distribution:

3%: Pancake swap (Number of tokens per transaction is limited according to the AMM To prevent high price impact).

6%: Kuro Team

6% Marketing, Airdrop

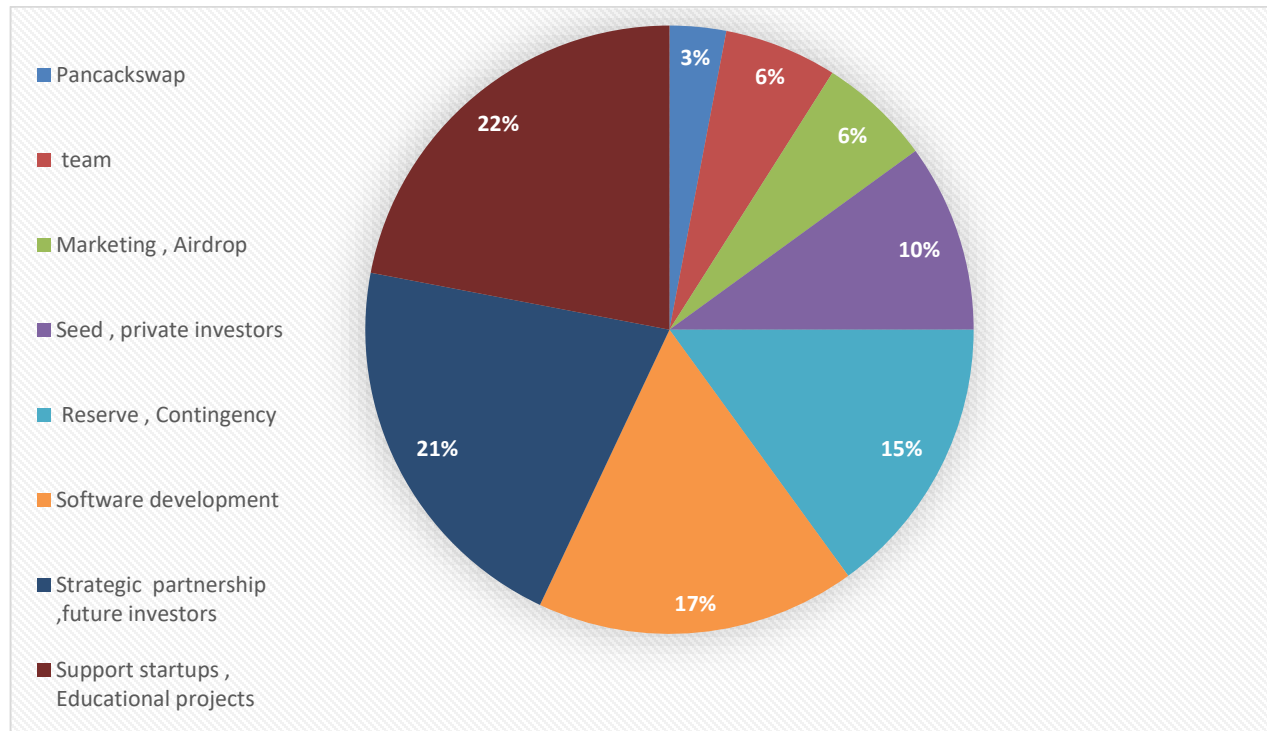

10% Seed, Privet investors

15% Reserve, Contingency

17% Software development

21% Strategic partnership, future investors

22% Support startups, Educational projects

***Note : all Liquidity pool tokens are locked By TrustSwap**
